

How to make the poppy:

1. Colour the shapes in the poppy petals different shades of red, orange, and yellow. If you want to be daring, throw in some other bright colours. Turn your paper over and colour the back of the poppy red.
2. Colour the middle of the poppy black, and the stalk shades of green.
3. Crumple up your paper, and then straighten it out.
4. Cut around the thick black lines and the dotted lines.
5. On the back of the petal shape pinch in the middle of the flower so the petals fold up into the shape of a flower. Twist where you have pinched to make a short stem. Cellotape or staple the stem to hold the flower shape.
6. Roll the stalk length ways to make a straw. Cellotape along the long edge.
7. Push the base of the flower into the middle of the stalk and cellotape or staple together.
8. Glue or use double-sided cellotape to stick the middle of the flower into the poppy.

GREAT WORK, YOU ARE DONE!
