

Create Geometric Art Work

Quick and easy art work for your space, created by Leah

What You Will Need:

- Stretch Canvas
- Masking Tape
- Acrylic Paint
- Gesso Primer
- Paint Brushes

Ensure your masking tape is pressed down firmly for minimal paint bleed

Try mixing modelling paste with one of the colours to give parts of your painting a different texture

Instructions:

1. Coat the canvas with Gesso Primer, this helps to create a smooth surface for your painting and also helps your painting last longer
2. Keeping the two canvases aligned, edge to edge, apply your preferred thickness of masking tape at multiple angles across both
3. Apply one colour of acrylic paint to most of the sections between the masking tape
4. Apply another colour to the remaining sections of the canvas
5. Apply a matte or gloss varnish once the paint is completely dry for a perfect finish
