

### Mixed Media: CRACKLE MEDIUM PROJECT

#### step 1

Paint crackle medium generously onto a primed surface using a wide flat brush.

#### step 2

Allow to dry, you will notice cracks appearing while drying.

#### step 3

Paint using misters in 3 stripes of colour.

#### tips

1. The thicker the crackle paint is applied the bigger the cracks.
2. Try thin and thick passages of crackle paint on the same canvas to vary the size and shape of the cracks on your artwork.
3. Choose 3 mister colours that work well together.
4. Stick to 3 mister colours, using too many may confuse the effect.
5. Wear old clothes and lay newspaper under your project to catch any over spray.
6. Experiment with using the misters before applying to your artwork to ensure you achieve the effect you want.
7. Multiple artworks in different colours look fantastic hanging side by side. Try hanging 3 or 4 together!

#### What you will need?

- > DecoArt Crackle Paint
- > DecoArt Media Misters
- > Wide flat brush
- > Das Exhibition canvas or Gesso Board
